About

A second-year Informatics major student seeking opportunities in Web Development and Product Design. With a passion for technology and a curiosity for exploring new possibilities, I thrive on experimenting with the latest tech and programming languages. Balancing teamwork with individual initiative, I'm committed to making valuable contributions to innovative projects.

Education

Bachelor Degree in Informatics Major, *University of Jember*

2021 – present

Experiences

2D Rigging Artist Freelancer, *Fiverr*

Work as 2D Animator with more than 10 successful gigs. Collaborated closely with clients to understand their requirements and delivering high-quality rigging on time and within budget.

Streaming and Broadcast Manager, *Twitch & Youtube*

Worked in an Agency, successfully operated and managed a live streaming channel, leveraging technical skills and expertise in OBS Studio and Streamlabs

Projects

College Project : Agriculture Consultation and Networking Platform, *as Product Designer*

- Led the product design process. Utilizing tools such as Enterprise Architect to develop UML Diagrams and Figma to create user flows and interactive prototypes, ensuring a user-friendly and intuitive interface.
- Actively participated in Agile Scrum such as sprint planning and sprint reviews.
- Collaborated with Analyst and Programmer, ensuring a smooth workflow and successful project completion.
- Nominated as one of the best projects.

College Project : My Notes App, *Fullstack*

- Developed a fully functional CRUD web application using Laravel framework.
- Utilized Blade.php and Tailwind CSS for intuitive and modern styling of the application.
- Utilized Laravel's Eloquent ORM, migrations, and seeders for efficient database management.
- Designed an intuitive user interface for seamless note creation, editing, and deletion.

College Project : Advice Generator App, *Front-End*

- Implemented a user-friendly interface using HTML and Tailwind CSS.

- Utilized JavaScript to handle API requests and responses, integrating an external advice API into the application.

Web Portfolio, Front-End (Individual Project)

- Developed a personal portfolio website to showcase projects and skills using HTML and Tailwind CSS.

Daily Routine and Counseling Platform, UI Design (Individual Project)

- Utilized Figma, to design a visually appealing and user-friendly interface.
- Incorporated a calm and soothing color scheme to create a supportive and comforting user experience.

{ } Programming Language & Framework

HTML | CSS | JavaScript | PHP | Python | Tailwind CSS | Laravel

Software

Adobe Photoshop | Adobe Premiere | Figma | Notion | Trello | Office | Enterprise Architect
OBS Studio | Streamlabs | Live2D Cubism

Languages

Indonesian (*Native*) | **English** (*Proficient*)

Organizations

Informatics Olympiad 2022 & 2023, as Designer Committee Member

- Contributed in preparing pre-event publications, utilizing Figma to design visually appealing and engaging promotional materials.
